

Personal profile

Staša Borović, PhD, postdoctoral researcher

Institution

Hrvatski geološki institut

Croatian Geological Survey, Zagreb

Staša was born on 14th December 1984 in Čakovec, northern Croatia, where she received primary and secondary education. She finished MSc studies in geology at the Faculty of Science, University of Zagreb in 2009 and started working as a research assistant at the Croatian Geological Survey, Hydrogeology and Engineering Geology Department the same year.

She conducted research of geothermal waters, thermal properties and processes in the scope of scientific projects Geothermal map of Croatia and Basic hydrogeological map of Croatia, GeoThermalMapping – Research and Promotion of Shallow Geothermal Potential in Croatia and DanReGeo-DATA. At the same time, she finished her PhD studies in geological engineering at the Faculty of Mining, Geology and Petroleum Engineering, University of Zagreb with a thesis about integrated hydrogeological, hydrogeochemical and numerical research of hydrothermal systems.

Her interests include geothermics, hydrogeology and environmental protection with emphasis on groundwater.

She is a member of Croatian Geological Society and International Geothermal Association, and the secretary of Croatian National Chapter of International Association of Hydrogeologists.
