

Personal profile

Profile Dr. Alla Shogenova (ENeRG President 2007)

Company

Department of Geology at Tallinn University of Technology

Dr Shogenova was the ENeRG president in 2007, responsible manager of the ENeRG website in 2008–2011 and 2018-2019 and editor of the GEO ENeRGY Newsletter in 2012-2017.

Dr Shogenova is a Senior Researcher at the Department of Geology at Tallinn University of Technology (TalTech). Since 1994 she has been a leader of Estonian and international research projects, including the EU-FP6 projects EU GeoCapacity, CO2NetEast and EU-FP7 projects CGS Europe, CO2Stop and ESTMAP.

Dr Shogenova is an author of more than 150 scientific publications and Associate Editor of the BGTA journal (Bollettino di Geofisica Teorica e Applicata). She has multidisciplinary research interests in the field of sedimentary geology including rock physics, petrophysics, reservoir and cap rock properties, geochemistry, mineralogy, diagenetic processes, oil-shale deposits, mathematical geology, CO₂ geological and energy storage and CO₂ use.

At the present time Dr Shogenova is a leader of the Estonian team in the Horizon 2020 projects ENOS and CLEANKER. She is lecturing the CO₂ Geological Storage course for international students and supervising PhD and Master students in TalTech. Dr Shogenova is a member of Estonian Geological Society, the Board member of the BASRECCS network and representing TalTech in CO₂GeoNet.

Dr Shogenova was graduated from the Leningrad Mining Institute as a Mining Engineer-Geophysicist and has a PhD Degree in Geology and Mineralogy.
