

Personal profile

Barbara Merson

Institution

National Institute of Oceanography and Applied Geophysics – OGS Department of Geophysics

Barbara Merson is graduated in Environmental Science, with marine specialization, and has a University Master's Degree in Management of Universities and Research.

She has worked in Italy and abroad in both public and private projects, coordinating and drawing up Environmental Impact Assessment (EIA) reports. She was a member of the regional EIA advisory committee, which decides about the environmental compatibility of the projects.

Since 2010 she has been working at OGS within the technical-scientific organisation of International projects and Italian initiatives in the field of geological storage of CO₂ - CCS. She was the OGS scientific responsible for two FP7 European research projects (CGS Europe, ECCSEL PPI) and for the study commissioned by the Italian Ministry of Environment of the potential risks and environmental impacts both on the terrestrial and the marine environment associated with CO₂ geological storage. She was directly involved in support for the research communication, planning and management of research projects funded by the European Union.

In the last years, she has worked for the Research Promotion and International Cooperation Office, supporting the planning and management of research projects funded by the European Commission and public bodies at national and local levels. She is maintaining contacts and relations with the European Commission and the Italian Agency for the Promotion of European Research.

Since April 2020 she is a member of the CO₂GeoNet Secretariat.
